SALTO SYSTEMS

Since 2001, SALTO Systems has been delivering state-of-the-art, wire-free, and keyless electronic access control solutions and has established a strong presence in the commercial building and work space market. SALTO is synonymous with innovative solutions that set new standards in security, manageability, flexibility, and design that bring real-world benefits.

SALTO KEYS AS A SERVICE (KS)

SALTO KS is a flexible cloud-based access control solution that requires no software installation, nor the cost of a fully-wired electronic product. All you need is an online device with an Internet connection. With a broad range of hardware including electronic locks, cylinders and wall readers, smart access to any door is possible.
Have full control of all functions and features from the web app. And, while on the go, use the mobile app for keeping track of events, remote unlocking, and blocking.

FROM THE CAR PARK TO THE OFFICE

BUILDING ACCESS
– 24/7 access control that covers your entire property remotely
– Easily retrofit access points in older and heritage buildings where cabling is difficult
– Reduce number of physical keys to manage
– Grant location and time-dependent access for visitors and contractors
– Audit trails for insurance and accountability

BASE BUILDING / CAR PARK / ENTRANCE GATE
– Using the same credentials tenants, staff and visitors can gain access to these areas

OFFICE SPACE
– Grant time-dependent access for tenants, staff, visitors and contractors
– Easily revoke access of former tenants and grant access to new tenants and their staff

RETAIL SPACES
– Monitor and grant specific access for staff, suppliers, or delivery services to employee only areas, storage, and emergency exits

MEETING ROOMS & SHARED FACILITIES
– Optimize revenue and usage by changing access plans easily e.g. the out-of-hours hire of a room for events
– Tap-Book-Meet flexible spaces to improve meeting room management
– Give access to use copier machines and equipment.

LOCKERS & CABINETS
– Freely assign lockers to secure belongings with the same credential for access

LET YOUR TENANTS MANAGE THEIR OWN SPACE WITH POD

With SALTO KS Pod, you can save time outsourcing access control management to your tenants, all while keeping an overview of your building's operations. A Pod can be a floor within a building such as an apartment or an office. The Pod members (tenants) have access to the Pod at all times and can invite guests to the Pod for specific timeframes.

And your tenants will love having the unique experience of managing access to their own space.

THE LEADING CLOUD-BASED ACCESS CONTROL SOLUTION

Anywhere and on-the-go management
Manage access control from anywhere, on-the-go - even for multiple properties - simply by using the KS app or a web browser. Whether it's a visitor who arrived earlier than you or a new tenant without a tag, you can unlock doors via remote opening.

A solution for every access point
Stand-alone battery-operated locks can be fitted on just about any type of door, gate or other access point, no matter what age or style. Older or heritage buildings are easily retrofitted.

Low cost installation & operation
Because stand-alone systems mean no need to install wiring throughout the building, they usually fit even the most modest of budgets. Ongoing costs are manageable too, with no electricity needed to power them, and all the software managed for you in the Cloud - no need for hosting!

Offer a range of convenient credentials
Eliminate physical keys and offer flexible and secure options to access from iOS or Android smartphones, Tags, or PIN code.

Real-time audit trails & monitoring
SALTO reports on access, giving full visibility of who has been (or tried to go) where. The property has an audit trail in the case of missing assets, and the information can also highlight potential security risks before they happen.

### Automate doors & report on their status
Make your doors more intelligent by specifying when they lock, open, and for who. SALTO also reports on doors that have been left open or forced open by intruders or vandals.

Scalable
Where the budget doesn't extend to fitting a new system throughout the facility, the SALTO system is scalable, allowing part installation in one budget year, and expansion later when more funding is available.

Programmable
Unlike a physical key-based system, SALTO allows the manager a far more granular level of control, specifying not only who can enter certain areas, but on what day/time and for how long. Improved security enhances the safety of assets and people.

SALTO ELECTRONIC LOCKS & PERIPHERALS

SALTO offers a wide selection of aesthetically-designed electronic locks and wall readers that can be deployed in commercial buildings. Our products are manufactured to the highest standards in Spain, comply with relevant local standards and regulatory requirements such as AS1428.1 relating to door lever handle specification, and tested for heavy usage and tough environments.

Please see below for some examples, and contact us for more information on our entire range.

XS4 ONE
Revolutionary stand-alone electronic lock that includes the latest electronic components for future-proof compatibility. Fits even narrow frame doors.

XS4 WALL READER
A reader with optional keypad allows for the additional use of a PIN keypad option.

NEOXX PADLOCK
Incredibly tough and IP68 rated, this padlock brings the benefits of electronic access control to perimeter gates, equipment yards, storage areas and more.
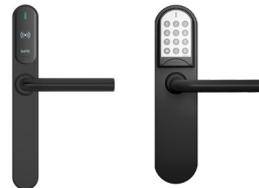

XS4 MINI
For indoor applications: quick and easy install makes it ideal for retrofits. Wide range of finishes, handles and retrofit cover plates to meet installation needs.

NEO CYLINDER
Designed for doors where fitting an electronic escutcheon is not possible e.g. server racks, gates, cabinets, electric switches, sliding doors and more. IP66 rating.

XS4 ORIGINAL
A totally wire-free networked electronic lock, specially designed for use on busy, high traffic doors that need additional strength. Also available with keypad for PIN code access.

XS4 LOCKER BLE
High-level security for a wide range of lockers, cupboards, cabinets, boxes, etc.

IQ
The IQ serves as the brain of your site, connects your wireless locks to the cloud and can be extended by adding additional repeaters if needed.

THE RIGHT PARTNER

If your security and risk management is posing a challenge, and you're considering a move to an electronic access control system, it's essential to choose the right partner. One who understands your needs and the technology that will best meet them. A partner who has worked with businesses just like yours and helped them reap the benefits of electronic access control.
